

QUICK START GUIDE

BEFORE YOU START

CHECK YOUR KNIFE

It is of utmost importance that the vinyl is cut so deep that it separates 100% from the surrounding material. Insufficient force on the knife or an old/dull knife will likely result in letters or other graphics getting removed by the Vinyl Remover.

N.B.: Remember to use a knife for detailed cuts if you are working with small letters/graphics.

PEELING LETTERS

For the best result when peeling mostly letters, peel from right to left as shown on the image.

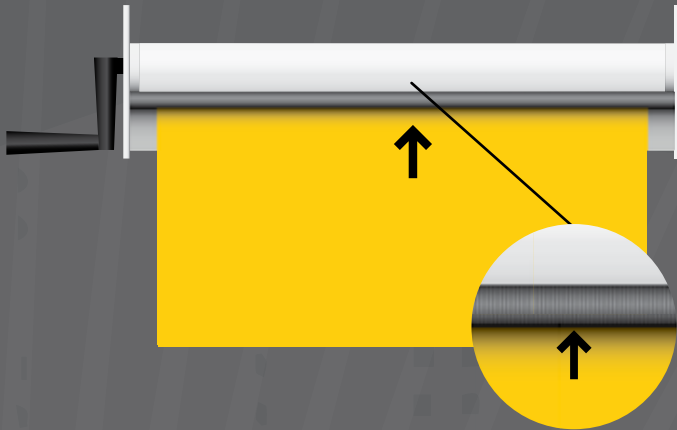

PEELING NUMBERS

When peeling mostly numbers peel from left to right for the best result.

Scan the code for video demonstrations on YouTube

QUICK START

STEP 1

Place the job you wish to peel at the back of your machine as shown on the image to the left. Make sure it goes under the tube.

The job must always be placed with the liner against the table. Push the first 5-10 cm of the job through the machine and onto the table.

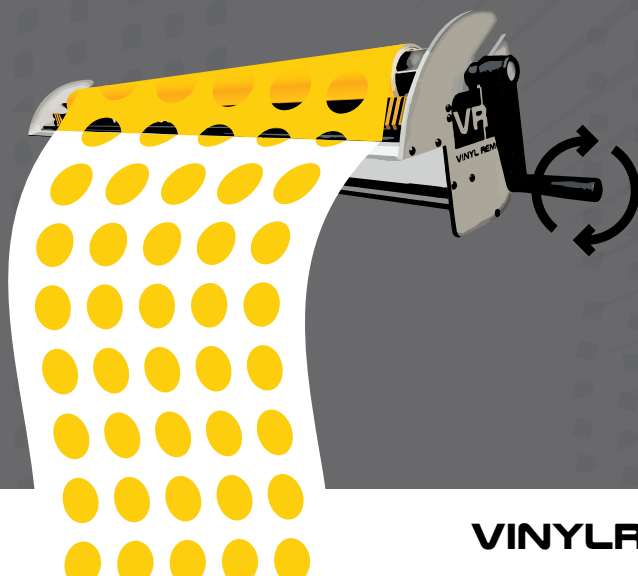

STEP 2

Separate the vinyl from the liner as shown on the image to the left (a) and fasten the vinyl to the roll (b).

N.B.: Double sided tape on the core is necessary the first time you use the machine. From here on you will be able to fasten the vinyl to the vinyl you've previously 'stripped'. When you wish to change the core you can either a) Cut of the vinyl and reuse the core, or b) throw out the old core with vinyl and mount a whole new core. (Cardboard is advisable but any kind will do)

STEP 3

You can now peel the vinyl by turning the handle counterclockwise as shown on the image to the left. Use one hand to gently guide the liner away from the machine.

IMPORTANT: For the best results make sure a) the vinyl is held tight while separating from the liner. b) the media is laying straight on the table.

JUST IN FROM DENMARK

Watch it work

This machine will peel any job (be it sheets or entire rolls) from any of your cutters or print 'n cut systems. It works with any type of vinyl, print with or without laminate, reflective vinyl and textile vinyl. It is the perfect tool to optimize your work flow!

Save time and money

The Vinyl Remover peels your job in full width. There is no need for the use of Weed boxes or tiling – You can peel a whole roll up to 45 meters in a single work flow without interruptions!

Minimal waste

Are you sick of crumbling up leftover vinyl by hand? Are you Sick of filling your waste bin in no time? No more! The Vinyl Remover collects all leftover vinyl on the core for easy disposal. It even takes up much less space!

Hand free

The Vinyl Remover prevents the already peeled vinyl from making contact with the rest of the job while you peel. You can stop at any given time without losing your progress.

Using less space

You can now peel up to 45 meters without having to move. You don't need to move around any sheets, and you don't have to buy a huge table.

Flexibility

The Vinyl Remover can handle rolls in all widths up to 1700mm. It can be used from both sides by flipping the handle to the other side.

Easy to use

The Vinyl Remover can be used by anyone, anywhere and doesn't require any electrical power.

Easy set-up

The Vinyl Remover has been designed to take up the least possible amount of space. It can be mounted directly on your worktable. With extra magnets it can even be mounted to your RollsRoller (or other flatbed table) without the need of screws.

Durable

The Vinyl Remover is made of durable materials and will work for many years to come.
